# **Precautionary statements**

P273	Avoid release to the environment.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P303+P361+P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER or doctor.
	Dispose only when container is empty and closed. For disposal of product residues, refer to safety data sheet.

# Hazardous component(s) to be indicated on label (Regulation (EC) No. 1272/2008)

potassium hydroxide; dimethyldioctylammonium chloride

# 2.3. Other hazards

contains

No special hazards have to be mentioned.

The product contains no PBT substances. The product contains no vPvB substances. This product does not contain a substance that has endocrine disrupting properties with respect to human. The product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms.

# **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

# **General information**

Remove contaminated, soaked clothing immediately and dispose of safely. Clean body thoroughly (bath, shower). In any case show the physician the Safety Data Sheet.

### After inhalation

Ensure supply of fresh air. When spray fog inhaled, seek medical aid.

### After skin contact

After contact with skin, wash immediately with plenty of water. Take medical treatment.

### After eye contact

In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. Summon a doctor immediately.

# After ingestion

If swallowed, seek medical advice immediately and show this container or label. Rinse mouth thoroughly with water. Let plenty of water be drunk in small gulps. Do not induce vomiting.

# Adhere to personal protective measures when giving first aid

First aider: Pay attention to self-protection!

### **4.2. Most important symptoms and effects, both acute and delayed** Until now no symptoms known so far.

# 4.3. Indication of any immediate medical attention and special treatment needed

# Hints for the physician / hazards

In the case of swallowing with subsequent vomiting, aspiration of the lungs can occur which can lead to chemical pneumonia or asphyxiation.

# **SECTION 5: Firefighting measures**

# 5.1. Extinguishing media

# Suitable extinguishing media

Extinguishing measures to suit surroundings

# Non suitable extinguishing media

Full water jet

### **5.2. Special hazards arising from the substance or mixture** In case of combustion evolution of dangerous gases possible.

# 5.3. Advice for firefighters

Special protective equipment for fire-fighting apparatus.       Do not inhale explosion and/or combustion gases. In case of combustion use a suitable breathing apparatus.         Other Information Collect contaminated fire-fighting water separately, must not be discharged into the drains. Fire residue and contaminated fire-fighting water must be disposed of in accordance with the local regulations.         SECTION 6: Accidental release measures         6.1. Personal precautions, protective equipment and emergency procedures Avoid contact with skin, eyes and clothing. Refer to protective measures listed in Sections 7 and 8.         6.2. Environmental precautions Do not discharge into the drains/surface waters/groundwater.         6.3. Methods and material for containment and cleaning up Pick up with absorbent material. Dispose of absorbed material in accordance with the regulations.         6.4. Reference to other sections Refer to protective measures listed in Sections 7 and 8.         SECTION 7: Handling and storage         7.1. Precautions for safe handling Avoid formation of aerosols. Observe the usual precautions for handling chemicals. Keep container tigh closed.         Advice on protection against fire and explosion The product is not combustible.         7.1. Conditions for safe storage, including any incompatibilities Recommended storage temperature Value > 0 < 30 °C Requirements for storage rooms and vessels Keep in original packaging, tightly closed. Storage rooms must be properly ventilated. Containers which are opened must be carefully resealed and kept upright to prevent leakage. # 12.5. Results of PBT and vPvB assessment

# **General information**

not determined

# Results of PBT and vPvB assessment

The product contains no PBT or vPvB substances.

# 12.6 Endocrine disrupting properties

# Endocrine disrupting properties with respect to the envrionment

The product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms.

# 12.7. Other adverse effects

# **General information**

not determined

# General information / ecology

The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

# **SECTION 13: Disposal considerations**

# 13.1. Waste treatment methods

# Disposal recommendations for the product

EWC waste code18 01 06\*chemicals consisting of or containing dangerous substancesEWC waste code20 01 29\*detergents containing dangerous substancesThe listed waste code numbers, according to the European Waste Catalogue (EWC), are to beunderstood as a recommendation. A final decision must be made in agreement with the regional wastedisposal company.

# **Disposal recommendations for packaging**

EWC waste code15 01 02plastic packagingCompletely emptied packagings can be given for recycling.EWC waste code15 01 10\*packaging containing res

packaging containing residues of or contaminated by dangerous substances

Packaging that cannot be cleaned should be disposed off in agreement with the regional waste disposal company.
