

neodisher[®] ProTech 10*

* formerly neodisher 722

Liquid, alkaline cleaning agent for use in special washers;
free of phosphates and active chlorine, complexing agent free

Main fields of application:

For the mechanical cleaning of production parts in industrial applications, such as coated data glass plates, as well as in the metal industry, where complexing agent-free detergents are required.

Characteristics:

neodisher ProTech 10 is a liquid, alkaline detergent. Saponifiable or alkali-soluble residue on production parts or other materials are dissolved.

neodisher ProTech 10 contains no silicone compounds, phosphates, active chlorine or other complexing agents. Nickel chrome steel, plastics and rubber (resistant against alkalinity) are not attacked. neodisher ProTech 10 is unsuitable for cleaning aluminum, eloxal und light alloys.

neodisher ProTech 10 can only be used with soft water.

Application and dosage:

2 - 4 ml/l

Subsequently the neodisher ProTech 10-solution has to be rinsed out completely by sufficient rinsing. Do not mix with other products.

Rinse out dosing system including hose with water before changing product.

Only for professional use.

Technical data:

Density (20 °C): 1.45 g/cm³

pH-range (determined in deionised water, 20 °C) 2 - 4 ml/l: 12.3 - 12.6

Viscosity (concentrate, 20 °C): < 50 mPas

Titration factor: 0.21 (in accordance with neodisher titration method)

Ingredients:

Alkali

Storage information:

The product is sensitive to frost. The colour of neodisher ProTech 10 can change due to the storage conditions, the application properties will not be affected.

Hazard and precautionary statements:

For safety information see EC safety data sheets. These are available at www.drweigert.com under the category "Download".

If applied according to the instructions for use the product is safe according to the appropriate guidelines for food processing.

Dispose only when container is empty and closed. For disposal of product residues, refer to the Material Safety Data Sheet.
